

Press Release

ACE Interactive resumes Server Based Gaming Project in Norway

LONDON, January 10th, 2008: Aristocrat Leisure Limited announced today that its fully owned subsidiary ACE Interactive has received an initial order of 500 interactive Video Terminals (iVT) from Norsk Tipping, the Norwegian National (State) Lottery. These terminals will be implemented during a re-launch which begins in summer 2008.

The supply of these iVT's is part of the True Server Based Gaming project which was initially entered by Ace Interactive (former Essnet Interactive) and Norsk Tipping in 2003. Execution of the project was delayed pending the outcome of a legal challenge brought by existing operators. The case was resolved by a decision of the EFTA (European Free Trade Area) court in March 2007 and as a result the Norwegian government authorised Norsk Tipping to resume the roll-out of the project.

"It has been a long time coming but we are very glad to finally be able to re-commence the execution of this project. We have been working very closely with Norsk Tipping to create a gaming solution which will support both the responsible gaming needs of Norsk Tipping and one which will provide players with an attractive variety of games and interactive video Terminals," said ACE Interactive's CEO Michael Koch.

"After the state government allowed us to resume the project both organizations have worked hard to ensure the end solution is one which achieves all of our objectives," said Tollef Imsdalen, Senior Vice President of Norsk Tipping.

Nick Khin, Executive General Manager, EMEA for Aristocrat, added "We are very excited to be working with Norsk Tipping on this large scale video lottery terminal and server based gaming project. The rollout of the ACE Interactive solution across Norway will demonstrate the strength and scalability of our server based gaming solution. This is the same platform that has recently been submitted to GLI for approval for use in a casino environment. We anticipate final GLI certification in the 1st quarter 2008."

It is expected that the iVTs will be placed in locations throughout Norway whereas the server based gaming central system will be located and operated by Norsk Tipping in Hamar, Norway.

ABOUT Norsk Tipping AS

Norsk Tipping is Norway's leading games company, wholly-owned by the Norwegian state. The company's main objectives are to provide the Norwegian people with responsible games and entertainment within social acceptable conditions, and at the same time ensure a secure and long-term surplus for the beneficiary organizations. The surplus is divided equally between the sports and culture sectors. The company operates the games of chance, Lotto, Viking Lotto and Joker; the games of skill, Tipping and Oddsen; and the scratch game Flax. In addition, the company operates the TV game, Extra, on behalf of the Norwegian Foundation for Health and Rehabilitation.

ABOUT Ace Interactive

ACE Interactive was founded in 2003 to develop and market the next generation of video gaming systems. Located in Stockholm, Sweden, London, UK and Las Vegas, USA, ACE Interactive's solution provides for true server-based gaming for operators who demand flexibility, content, security and social responsibility. In May 2006 ACE Interactive was acquired by Aristocrat. For further information please visit the company's website at www.aceinteractive.se.
