An Aristocrat Global Staff Announcement

Friday, 4 April, 2008

## Appointment of Director Business Development - Americas ACE Interactive

ACE Interactive is preparing to enter the Americas **VLT (Video Lottery)** market. This market currently consists of over 100,000 VLTs with additional jurisdictions considering legislation providing for an additional 50,000 VLTs in the next 5 years. This market is expected to undergo a big paradigm shift away from proprietary central monitored systems towards thin client server based gaming solutions.

It therefore gives me great pleasure to announce the appointment of **Roy D. Garrett** to the position of **Director Business Development - Americas for ACE Interactive**. This appointment is effective from April 1 and in this role Roy will report to me with a dotted line into Sean Evans (Senior VP Sales) of Aristocrat Technologies, Inc.

Roy will oversee all Business Development opportunities for ACE Interactive in the Americas. Together with Marketing he will also drive ACE's sales and marketing initiatives in this region. He will be supported by the Product Management & Professional Services (P&P) Team of ACE Interactive. Roy will also liaise closely with Aristocrat's North American Office to ensure co-ordination and leveraging of both activities and opportunities.

Roy, originally from the state of Texas, started his career in the gaming industry in 1987 as an account executive with the route division of IGT. He later served as General Manager for two major slot route companies in Nevada. As Vice President of International Route Operations for Sodak Gaming, Roy was responsible for establishing slot casinos and route operations in Latin and South America. He most recently was Director of Business Development in the United States for Bally Gaming and a privately owned slot route/tavern operator in Las Vegas.

Please join me in welcoming Roy to our Team.

**Michael Koch**  
CEO ACE Interactive
